

The 46' Accu-Steel Cattle Building

The Accu-Steel Cattle Building is designed specifically to provide a dry, managed environment with excellent air quality to unlock cattle's potential from young calves to finish weight. Accu-Steel's unique features will provide you with reduced bedding needs and decreased labor requirements, while delivering nutrient-dense dry manure to increase your daily gains and accelerate your time to market.

- Managed environment for less animal stress - cattle stay cool in the summer, dry all year
- A full **46'** wide to give producers management options on head density and bunk space
- Reduced manure management and labor costs with a dry deep bedding pack
- 14 oz. Accu-Keder Cover - Individual cover per building bay – 15 year warranty* See for details
 - Most weather secure connection between truss and cover in industry
- Cover new or existing facilities – Install on existing grade to minimize ground work
- Fully engineered building & **Wide Flange Beam Post Foundation** – USDA/NRCS/EQIP Compliant
- 5' Bunk Eave - Wide enough to protect the bunk from rain and snow
 - Tall enough for equipment to safely pass under
- Ridge vent designed to work with building eaves to provide excellent air quality
- Air Management Tools - Optional end walls with 2 way gather doors and optional side curtains
- 2' Curtain Eave - Pushes water away from the building , bedding, and cattle
 - Maintains air quality even when optional curtain is raised
- Hot Dipped Galvanized steel for maximum corrosion protection
- Accu-Steel Factory Service and Installation - Covering **Existing Facilities** to turn key construction
- Accu-Steel Inc. is a family owned company - Proudly designed and manufactured in Iowa

Managed Environment + Lower Costs + Faster Gains = Higher Returns
